

Security of ECJ Website & Elector Information

The Electoral Commission of Jamaica (ECJ) takes cyber security and the security of electors' information seriously.

Important information about the security of our data:

1. The ECJ website is hosted externally.
2. There is no connection between the website and the database hosted by the EOJ which includes photographs, biometric data and other personal information pertaining to the elector that is not deemed public.
3. The electoral information available on the ECJ website is limited to what we are legally required to make public. The source of this information is the voters' list, which is a public document and may be found in post offices island-wide and at the offices of the Returning Officer.
4. Our query tool allows electors to confirm that they are on the voters' list and access information on where to vote. Address fields are blank and no confidential information is listed.
5. No confidential employee information is hosted on our website.
