

## **CAREER OPPORTUNITY**

### **THE ELECTORAL COMMISSION OF JAMAICA**

**Invites applications from suitably qualified persons for the following position:**

#### **GIS WEB DEVELOPER (MIS/IT 4)**

##### **JOB PURPOSE**

To implement and maintain the EOJ's Web and Mobile GIS services, develop geospatial web and mobile applications in support of the organization's business processes and focus and to provide technical support in the creation and maintenance of spatial data and to support overall GIS security. Incumbent is also required to use programming skills to support other information systems processes and general data management.

##### **Core Duties**

Reporting to the GIS Manager, the incumbent will be required to perform the following duties:

- ◆ Provides technical support in the creation, general maintenance and updating of the EOJ's GIS database.
- ◆ Maintains the security of geospatial applications and supporting infrastructure.
- ◆ Offers ongoing support to internal and external customers with respect to the use of geospatial applications.
- ◆ Plays a lead role in the creation and maintenance of the EOJ's web and mobile GIS services.
- ◆ Develops customized geospatial web and mobile applications utilising electoral and supporting data for the purposes of the EOJ.
- ◆ Troubleshoots and debugs technical challenges that may arise with respect to application development.
- ◆ Utilizes programming skills to bring improvements to existing information systems processes and to support improved data management (both spatial and non-spatial).

##### **Minimum Qualification and Experience**

- ◆ A first degree in an Information Technology (IT) related field from an accredited institution
- ◆ Two (2) years' experience in a similar capacity.
- ◆ A background in a geography-related field would be a definite asset

**Remuneration:** \$1,710,225 – \$2,032,920 per annum plus applicable allowance.
